- **Languages:** HTML5, CSS, Javascript, Java, C/C++, PHP, MySQL, Python, Git, SVN
- **Frameworks:** NodeJS, Android, Bootstrap, AngularJS
- **Operating Systems:** Windows XP-10, OSX, Linux Debian/Arch

EXPERIENCE

Intelliwheels

May 2015-(August 2015)

Software Engineer

- Operated as a full-stack developer that managed client and server side code.
- Built a highly interactive canvas-based interface that was optimized extensively to eliminate lag, all while having an elegant ux design.

PROJECTS

BrailleLens

September 2015

- Real time braille to text translator in Android
- Aimed as a tool to assist teachers of the visually impaired, who reportedly spend more than half their painstakingly deciphering braille.
- To use, simply hover your phone's camera over braille and the app overlays text where the braille was

MyRightToPlay.com

December 2010—(December 2012)

- Co-developed a flash portal that dynamically scrapped and displayed high quality flash games.
- Users had the ability to create their own accounts, gain rewards for playing, and received suggestions of other games based on their preferences.
- Learned a great deal about web practices, elegant UI, and optimal database management.

HACKATHONS

- Consistently won at least 1 prize in the last 10 hack attempts.
- Relished the experience of working with others to build an amazing product in mere hours.
